

## Website Report

In summary we are getting around 2,000 visits per month (with a strange peak in November). Most people look at the site around 9:00 AM and in November we had a lot of visits between 11:00 AM and 2:00 PM. Our 2 pages giving ASPRA News and Croydon News are consistently the most visited after our home page.

The November figures were distorted by a remote host that no longer exists at 194.66.232.88

It appears to be a hacker/crawler bot site perhaps located in Wakefield.

<http://tools.tracemyip.org/lookup/194.66.232.88>

The daily usage figures on 7<sup>th</sup> December look quite odd, accounting for 26% of the use in that month.

The top 3 remote hosts are listed below:

109.169.21.198 is it seems a Microsoft related site :

see <http://www.iis.net/learn/install/installing-iis-7>

As we don't keep significant personal data on the site I am not too worried by this.

At worst the details of name, address and a few telephone numbers appear in old magazines.
